Technical field support, coordinated service and practical documentation for Ontario buildings and projects.

INSPECTION

Annual testing and documented findings

REPAIR

Fault diagnosis and corrective work

PROJECT SUPPORT

Installation and verification coordination

REGIONAL COVERAGE

Waterloo Region, GTA and beyond

SERVICES & CAPABILITIES

PARTNERSHIP MODEL

Specialized support for your projects

WARD Fire Safety welcomes subcontracting opportunities with electrical and construction companies. We can coordinate defined fire alarm scopes while respecting project schedules, site responsibilities and client relationships.

INSTALLATION SUPPORT

From rough-in coordination to device work

Support may include fire alarm device installation, circuit troubleshooting, panel and field device coordination, labeling, device replacements and preparation for testing, subject to the project design and agreed division of responsibilities.

SERVICES & CAPABILITIES

VERIFICATION & COMMISSIONING

Prepare for structured system testing

Support for CAN/ULC-S537 verification activities, functional testing, deficiency correction and commissioning coordination. Independent verification, required qualifications and final sign-off responsibilities must be established in the contract and under applicable requirements.

PROJECT HANDOFFS

Fewer surprises at turnover

We can coordinate around drawings, device schedules, sequence of operations, interface requirements, test records, deficiency lists and final handover documentation as defined in the project scope.

WORKING TOGETHER

TECHNICAL SYSTEMS

Familiar with major Canadian-market systems

Our technical work includes equipment from Mircom, Edwards / EST, Notifier, Honeywell, System Sensor, DSC and Stanpro. System-specific service is subject to equipment access, required training and site conditions.

HOW WE COLLABORATE

A straightforward subcontract workflow

1. Receive drawings and scope. 2. Clarify equipment, responsibilities and schedule. 3. Provide a scope-based quotation. 4. Coordinate access and site work. 5. Complete agreed testing and closeout documentation.

WORKING TOGETHER

PARTNER WITH WARD

Let us review your next project

Send the project location, drawings or device list, expected milestones and requested scope. We can discuss technical fit, scheduling and a subcontracting arrangement.

REQUEST A CONVERSATION

wardfire.ca

Tell us about your property, project or service needs. We will discuss scope, scheduling and the next step.

CONTACT & NEXT STEPS

LET'S WORK TOGETHER

WARD Fire Safety welcomes inquiries from building owners, facility teams, contractors and business partners.
